

SHARING CONCERNS

Photo courtesy of Montclair Breast Center

Dr. Nancy Elliott, founder and director of Montclair Breast Center on North Fullerton Avenue, and William N. Hait, M.D., Ph.D., director of The Cancer Institute of New Jersey, discuss the benefits of early detection of breast cancer. Hait recently visited Montclair Breast Center to review some of the alarming facts concerning cancer, particularly breast cancer, and New Jersey. More than 7,000 women were diagnosed with breast cancer in the state last year. Over the last 30 years, the incidence has risen 1 percent per year, each year. New Jersey ranks in the worst 10 states for cancer incidence.
