

Breast Imagers who specialize in reading mammography and breast MRI find twice as many breast cancers as general radiologists.*

Who Is Reading YOUR Mammogram?

Melissa Lee, MD, Marcie B. Hertz, MD, FACS, Rose Heller-Savoy, MD, Nancy L. Elliott, MD, FACS, Dana Holwitt, MD and Cheng Ou, MD

Each year an additional 45,000 women in the U.S. who have had mammograms are walking around with breast cancer and don't know it! Women, who come to Montclair Breast Center for regular examinations, have an 88 percent chance of detecting breast cancer at stage zero or stage 1!

Our nationally recognized, dedicated team of breast imagers and breast surgeons uses the most sophisticated technologies. Any questionable area is evaluated on the spot with additional views and/or ultrasound, MRI or BSGI. Our Breast Imaging Specialists will explain the results to you immediately. There is no waiting for a call-back. **Having your images explained personally in one visit is the experience that our patients say they appreciate most.**
