Montclair Breast Center recognized Breast Cancer Awareness Month, which was in October, by hosting an informative exchange of ideas and information at a gathering held at the center.

A dedicated team of doctors and specialists gathered at the Montclair Breast Center on North Fullerton Avenue in Montclair on Wednesday, October 22, 2003.

Founder and director of the center, Dr. Nancy Elliot, F.A.C.S., and Dr. Alan Rosen, F.A.C.S., of The Plastic Surgery Group, showed the newest develop-

mography, along with Breast MRI's and Tamoxifen for breast cancer prevention.

Cocktails and refreshments were served while 10 educational presentations were given by a professional staff dedicated to the early detection and future prevention of breast cancer.

According to the American Cancer Society, there will be 211,300 invasive and 55,700 in situ cases (confined to the site of origin, without invading surrounding tissues), expected in 2003.

This deadly disease accounts for nearly one in every three cancers diagnosed and is also the second leading cause of death for women in the US with approximately 39,800 deaths
