Dr. Nancy Elliott named top imaging specialist

Dr. Nancy Elliott, founder and medical director of Montclair Breast Center, was honored in January by Medical Imaging magazine's annual "Best of the Best" list, which names her as one of the top women's imaging specialists in the country.

ELLIOTT**

"I am grateful for the opportunity to highlight the need for risk assessment and quality breast imaging, which is required to detect breast cancer at its earliest

stages," stated Elliott.

The ranking, according to Medical Imaging magazine editor Andi Lucas, was to "acknowledge the best and the brightest in the field of radiology ... we want the industry's best to be recognized by their own peers."

The recognition of Elliott as a specialized imager reinforces one of the Montclair Breast Center's central tenets: that dedicated breast imagers are more efficient and accurate than gener-

al radiologists at reading mammograms and Breast MRIs.

In addition to providing digital mammography and breast ultrasound, the Montclair Breast Center is the first and only free-standing breast facility in the tri-state area to offer a fully dedicated Breast MRI, which enables them to continue detecting increasingly higher rates of early-stage cancer. This allows for earlier administration of therapies, less invasive surgeries and better chances of survival.
