

Who is Reading Your Mammogram? Who Needs Breast MRI?

Radiologists who specialize in reading breast images find twice as many breast cancers as general radiologists.*

Each year an additional 45,000 women in the U.S. who have had mammograms are walking around with breast cancer and don't know it!

Women who come to Montclair Breast Center for regular examinations, have a ninety-four percent chance of detecting breast cancer at stage zero or stage I! Personal attention and a holistic approach bring you the peace of mind that comes from knowing your doctors are uncompromising when it comes to the quality of your care.**

Our nationally recognized, dedicated team of breast imagers and breast surgeons uses the most sophisticated technologies, culminating in our new Breast MRI. In collaboration with GE Medical Systems, our new full strength 1.5 T signa magnet has been equipped

with EXCTE software technology. This is now truly the world's "Gold Standard" of Breast Imaging, and is the only one in the tri-state area.

Breast MRI uses no radiation. Instead, radiofrequency waves in a magnetic field create hundreds of images of the breast. These images are extremely precise. Early detection occurs even in women with dense mammographic patterns. It is well-known that mammography fails to detect breast cancer in up to 50% of women with dense fibroglandular patterns. Breast MRI excels in this situation, detecting even the smallest of cancers. The earlier the detection, the greater the chance that chemotherapy can be avoided. But technology alone is not enough. The expertise and experience of the team administering and interpreting that technology makes the real difference.

Montclair Breast Center has earned the reputation as a premier, multidisciplinary breast center, which specializes in proactive breast healthcare, risk-reduction techniques and the early detection and treatment of breast cancer. We are committed to providing better breast care than anywhere.

Montclair Breast Center

*A Comprehensive Breast Center
Proactive Healthcare for High Risk Women*

37 North Fullerton Avenue • Montclair, NJ 07042 • (973) 509-1818
