

Dear Dr. Elliot and Staff,

Now, that my hair is growing back and my reconstruction is complete I am finally feeling like my cancer journey is coming to an end. I also feel that I am truly ready to thank all the amazing people like yourselves that have gotten me to this point.

My family and I will never forget the day we came to your office. I was a 29 year old woman diagnosed with breast cancer. My family was extremely scared and we all really needed answers. You immediately invited my entire group of six people into your office and began going over everything we needed to know. When I made the decision to go through with the bilateral mastectomy and immediate reconstruction you helped to make me feel extremely confident in my decision. After that visit we were no longer scared we were all ready to take on this disease with strength and perseverance.

Also, I cannot thank you enough for introducing me to Dena, another young woman who had been faced with breast cancer. She was like an angel who helped to guide me through each day of my cancer journey. She prepared me for what was going to happen next when it came to Surgeries, Chemotherapy and Wigs.

Thank you so much for creating a place where women like myself can go and feel like being diagnosed with cancer is really just like getting a cold. It is something that can be treated and taken care of by wonderful people like yourselves. God Bless You!

Sincerely,
Melissa T. and Family
